

# Marriott donates to Heart & Stroke

The Heart & Stroke Foundation of Barbados recently received “a substantial cash donation” from Courtyard by Marriott Bridgetown (Barbados). The hotel said it was honoured to play a role in support of the foundation’s operation through its **Global Customer Appreciation Week Initiative**.

**Global Customer Appreciation** is a Marriott International programme where all Marriott-branded and managed hotels show their appreciation to their customers in the most creative of ways. This year Courtyard by Marriott Bridgetown (Barbados) visited some of its clients, accompanied by two registered nurses from the Heart & Stroke Foundation of Barbados.

Under the theme **Your World, Your Health**, the nurses administered several important examinations, chief of which were blood pressure and blood sugar checks, as well as body mass index testing.

Consultation was also provided to those persons who seemed to be “at risk”.

Subsequent to the tests, decision makers or influencers who attended or participated were informed of the overall health of their employees and were advised of some of the methods that can be undertaken to ensure a healthy and productive work environment.
